

Expertise In Turbomachinery Optimization

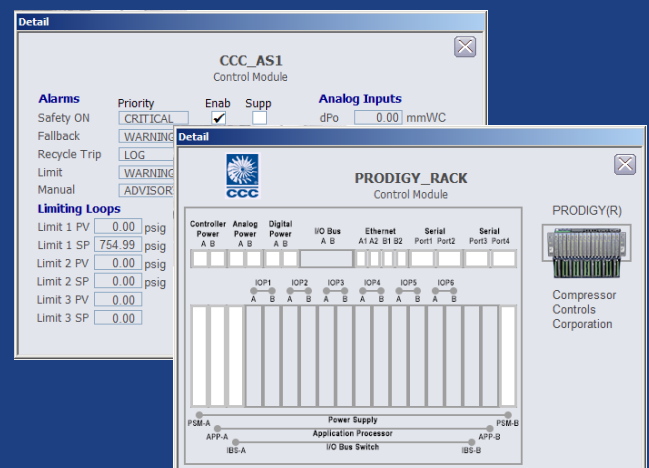

## Optimize your software to improve the operator experience with DeltaV™ – CCC Smart Gateway

### Improve operator effectiveness

Now, your CCC turbomachinery control solutions are tightly integrated with DeltaV Operate HMI for maximum operator effectiveness. Collaborative features streamline workflows for site operations team to share critical information, troubleshoot alarms, manage process reliability and achieve energy efficiency. CCC and Emerson have collaborated to develop DeltaV-CCC Smart Gateway.

### Features include:

- Out-of-the-box visualization templates including faceplates & detail faceplates
- Integrated alarm management with high context alarming
- Standardized user manuals
- Engineering services for configuring & testing the interface
- Software maintenance & support

Operators are equipped with information to make quick and accurate decisions. Utilization of DeltaV color themes and faceplate designs enables operators to stay on top of critical information about their turbomachinery. If any anomaly occurs, pre-populated CCC alarms help them understand and react to the situation before it escalates.

Adherence to the DeltaV HMI standard makes the new interface consistent with the existing screens – resulting in less confusions and operator training costs.

# Easy to implement

CONNECT

INSTALL

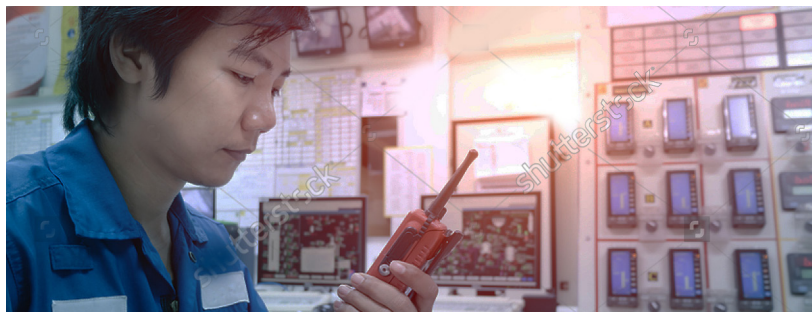

DOWNLOAD

DeltaV-CCC Smart Gateway features a library of DeltaV HMI components and provides automated data mapping between both platforms. Simply connect the two systems, install the application library on your DeltaV system, and download CCC-supplied project configurations that match your system to get the optimal interface. The rigorous standardization, testing, and documentation of the product reduces project risks throughout the interface implementation process.

If you are already using a CCC turbomachinery control system, updating your software to take advantage of the new DeltaV Smart Interface is not complicated. CCC provides a pre-engineered interface package that eliminates learning and design tasks.

A joint team of local CCC and Emerson engineers will help you get DeltaV-CCC Smart Gateway up and running in hours.
