training near you!

Benefits of Regional Training Courses

- Gain a better understanding of how the equipment works so you can identify and correct problems
- Training takes place off-site so attendees can participate and learn without interruptions
- “Hands-on” experience with CCC Series 3+/3++, Series 5 Vanguard, Prodigy and TrainTools Software
- Overall costs are minimized for facilities that need training for only a few people
- Courses can serve as training for new hires or as a refresher for existing employees
- Attendees network with other CCC users

Topics Include: Surge, Anti-Surge, Performance and Load Sharing Control, Maintenance and Basic Configuration with an optional 4th day for Advanced Tuning and Surge Testing at some locations.
