

## Unlock the Potential of Your Yokogawa FCS

## Introducing CCC Inside<sup>™</sup> for Yokogawa CENTUM VP

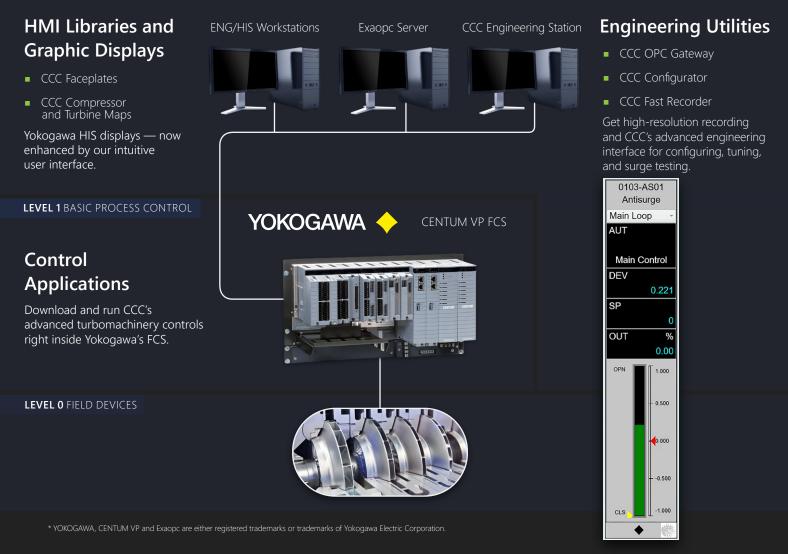

Trusted in over 10,000 installations around the world, CCC applications and algorithms are the gold standard for efficient and reliable turbomachinery control. CCC Inside<sup>™</sup> for Yokogawa CENTUM VP brings these solutions — refined over 40 years — to the Yokogawa Field Control Station (FCS), paving the way for flatter architectures and fewer vendor interactions.

- Combine Yokogawa's CENTUM VP platform with best-in-class turbomachinery controls from CCC
- Leverage the global presence and project execution capabilities of both Yokogawa and CCC
- Maintain consistency with CCC field-proven control applications running on CCC Pro Built™ platforms
- Enjoy ongoing validation, support of new software releases, and long-term lifecycle support

CCC Inside<sup>™</sup> is designed for seamless integration with Yokogawa's CENTUM VP FCS, enabling you to run CCC control applications directly from Yokogawa's hardware. With CCC Inside<sup>™</sup>, you can streamline operations and empower more personnel to manage your equipment. Plus, you get access to our knowledgeable field engineers — over 150 turbomachinery experts around the world who are ready to offer support.

## LEVEL 2 SUPERVISORY CONTROL
